SUBJECT INDEX

Book Reviews

Physics of Geomagnetic Phenomena 247
Ground Water Problems 351
Introduction to Palaeolimnology Developments in Sedimentology No. 11 447
The Radiation Belt and Magnetosphere 448
Winds and Tubulence in the Stratosphere, Mesosphere and Ionosphere 450
Bleaching Earths 451
Gravimetria 452
Coal and Coal-Bearing Strata 453
High Energy Reactions in Astrophysics 454

Continental Structure

Some characteristics of the tectonic stress pattern in Alaska, *Gedney, Larry & Berg, Eduard* 293

Physics of the interior of the Earth

Upper bound to change in incompressibility at the Earth's mantle–core boundary, *K. E. Bullen & R. A. W. Haddon* 179
The depth variation of the intensity of current induced in a model Earth and ocean, *A. A. Ashour* 321
Upper mantle structure along the axis of the Mid-Atlantic Ridge near Iceland, *T. J. G. Francis* 507

Gravity

The effect of humidity on the length of invariable pendulums, *H. D. Valliant* 327
Gravity measurements on the North American Calibration Line with the Canadian pendulum apparatus, *H. D. Valliant* 489

PAGE

Geomagnetism

Earth currents and magnetic field variations in the period range 10–200 s, *F. W. Jones, C. C. Ku & L. P. Geldart* 15
A model midnight meridian magnetospheric field, *P. C. Kendall, D. W. Windle, S.-I. Akasofu & S. Chapman* 185
Geomagnetic variations and seismic absorption in Scotland, *D. Davies* 317
Geomagnetic secular variation and its changes, 1942.5 to 1962.5, *S. R. C. Malin* .. 415
Geomagnetic variations and the electrical conductivity of the upper mantle, *R. J. Banks* 457

Heat Flow

Analysis of scatter in the oceanic heat flow data, *Prabhakar S. Naidu* 353

Letters to the Editors

On Darbyshire's method of analysing microseisms, *H. M. Iyer* 443
Reply to the letter by H. M. Iyer " On Darbyshire's method of analysing misroseisms ", *C. Hurst* 445

Magnetic properties of rock

Stability of remanent magnetization of igneous rocks, *E. Larson, Mituke Ozima, Minoru Ozima, T. Nagata & D. Strangway* 263

Oceanography

On the representation of the Reynolds stress in a tidal estuary, *B. Johns* 39
Observations of the directional characteristics of sea waves, *J. H. Simpson* 93
The attenuation of short gravity waves propagating in turbulent conditions, *B. D. Dore* 203

Palaeomagnetism

Non-dipole behaviour during an Upper Miocene geomagnetic polarity transition in Oregon, *N. D. Watkins* 121

Planetary physics

An introduction to the Martian grid system, *R. A. Wells* 209

Research Notes

To compute families of anomaly curves for two-dimensional magnetic bodies, *Y. Ispir & D. Kolçak* 243
Confidence limits for the precision parameter κ, *Allan Cox* 545

Seismology

Canadian magnitudes of earthquakes and nuclear explosions in south-western North America, *P. W. Basham* 1
A study of the crustal structure beneath the Irish Sea, *D. J. Blundell & R. Parks* .. 45
A study of primary and secondary microseisms recorded in Anglesey, *J. Darbyshire & E. O. Okeke* 63
Eigenvibrations of the Earth excited by finite dislocations—I. Toroidal oscillations, *Sarva Jit Singh & Ari Ben-Menahem* 151
Distance corrections for deep focus earthquakes, *Goetz G. R. Buchbinder* 195
A seismic refraction survey in the Red Sea, *C. Tramontini & D. Davies* 225
Seismic phases recorded in South Australia and their relation to crustal structure, *R. W. White* 249
Geomagnetic variations and seismic absorption in Scotland, *D. Davis* 317
Eigenvibrations of the Earth excited by finite dislocations—II. Spheroidal oscillations, *Sarva Jit Singh & Ari Ben-Menahem* 333
Recent improvements in the analysis of survace wave observations, *M. Landisman, A. Dziewonski & Y. Satô* 369
P wave velocities in the mantle below 700 km, *B. S. Gopalakrishnan* 405
The systematic error is seismic location, *Robert Underwood & Roy C. Lilwall* 521
Amplitude of body waves in a heterogeneous sphere comparison of wave theory and ray theory, *Ryosuke Sato* 527
